

FAIRWAY COLOUR

BOOST COLOUR WITHOUT EXCESSIVE GROWTH

At various times throughout the season, fairway turf needs a boost in colour without excessive growth. Propel, Largo, and Iron Maid deliver the key elements of colour-enriching chlorophyll in a highly efficient and economical spray mix.

INCREASE NUTRIENT AVAILABILITY AND DRAINAGE

Propel is a concentrated liquid humic acid and soil penetrant that decreases nutrient tie-ups and effectively moves excess water through compacted soils.

TIGHT TURF AND DENSITY

Largo initiates rooting, stress tolerance, turf tightening, and chlorophyll enzyme activators with patented biostimulant technology.

COLOUR

Iron Maid is a superior iron compound for use on fairways, roughs, sports fields, etc. to ensure linear availability of iron throughout the growing season.
