

BENEFITS:

INFILTRATION

DISPERSION

UNIFORM DISTRIBUTION

HYDROPHOBIC SOILS

HOT SPOTS

DEW

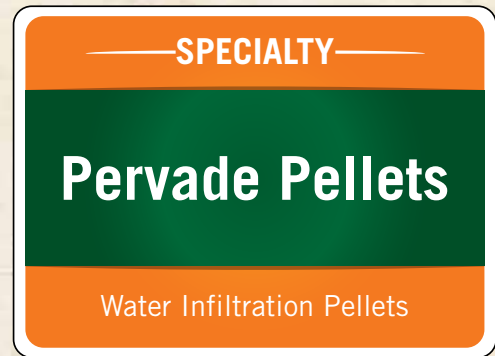

FLUSHING

PERCHING

Pervade Pellets are a penetrant designed to assist managers in areas where water penetration is needed in berms, undulating greens, roughs, and sloping terrain.

Pervade Pellets' proprietary formulation promotes quicker, longer-lasting moisture penetration properties in soil than traditional alcohol- and soap-based wetting agents.

Pervade Pellets are non-burning and are compatible with treated water supplies. Unlike alcohol and phenol wetting agents, *Pervade Pellets* are 100% biodegradable.

ACTIVE INGREDIENTS

Proprietary Blend of Di-Sulfosuccinate Soil Surfactants, Polymers, and Polyhydroxy Acids	82.0%
Buffers, Couplers, Stabilizers, and Solidifying Agents Ineffective as Adjuvants	18.0%

Net Weight: 12 x 227 g pellets

PROFESSIONAL USE GUIDELINES

APPLICATION:

Pervade Pellets will fit most hose-end applicator devices. Place pellet in hose-end application device prior to hand watering.

RATE OF APPLICATION:

Use as often as necessary to achieve desired level of water infiltration into the soil profile and to minimize excessive irrigation run off. *Pervade Pellets* will dissolve at different rates depending on water pressure, chemistry, temperature, and flow rate.

COMPATIBILITY:

Pervade Pellets are not intended to be combined with any other product.

Also available:

Pervade Magnum Pellets 2 x 3.18 kg pellets
