

TPW AQUAPRO

TPW Aquapro is a bio-active all-purpose soil wetting agent. TPW Aquapro is a unique all-purpose soil surfactant containing 5% kelp concentrate to stimulate plant root growth. TPW Aquapro is the ideal year-round wetting agent option for general turf and ornamental use to assist in penetration and retention of moisture, particularly in heavier soils or mulched surfaces.

In addition to the concentrated kelp extract, TPW Aquapro contains 45% blended surfactant, including a strong surface tension agent for rapid soil and mulch penetration, as well as a residual polymeric surfactant for ongoing performance following treatment.

Designed, formulated and packed in Australia with Australian conditions in mind.

Mixing

Tank mix combinations with AquaPro have not been tested on all varieties under all possible growing conditions. If the user is unsure a limited area should be tested and reasonable judgement and caution should be exercised. A jar test is recommended prior to broad scale use.

Typical Analysis (w/w)

Blend of Polymeric Surfactants	45%
Kelp Extract as Kelp	5%
Inert Ingredients	50%

Pack sizes

20L, 200L, 1000L

Product Characteristics

Colour	Deep Green
S.G.	1.15-1.49
pH	4.6-5.0

Situation	Rate per 100m ²	Rate per Ha	Comments
To improve general soil moisture efficiency and plant health in all turf situations including greens, tees, fairways and sports fields.	200mL	20L	Apply in a minimum of 400L/Ha of water. Repeat applications as required. For best results irrigate following application with 4–6mm of water. Irrigate immediately following application when temperature exceeds 30°C.
On ornamental plants to reduce the impact of moisture stress at planting and throughout the growing season.	300mL per 100m ² or 3L per 100L water		Apply in a minimum of 1000L of water monthly or as required.
