

WINTER STRENGTH

STAY AHEAD OF THE GAME FOR SPRING

Winter Strength is necessary to get through the harsh realities of cold temperatures causing slow growth and dormancy. Floratine's Winter Strength Plan builds and stores carbohydrate reserves for continued strength until spring arrives.

REDUCE TEMPERATURE STRESS

Astron provides strength, cell division, and complexed zinc for reduced temperature stress with essential micronutrients and patented biostimulants.

MODERATE, LOW NITROGEN GROWTH

X-Factor 4-4-16 with potassium thiosulfate and low nitrogen and phosphorous for improved cold weather tolerance and carbohydrate translocation to the roots.

COLOUR AND ROOTING

Renaissance's patented phytochemicals and micronutrients for root initiation, stress resistance, and colour.

ENERGY

Floradox Pro provides needed energy sources required for defense and recuperative protein production.

CARB LOADING

GlycoFuze provides needed glycomic sugars after a long growing season to prepare low cut turf with sufficient carbohydrates to ensure there is an adequate food source during the winter months.
