

Maxiplex utilizes humic acid technology to improve soil structure and reduce compaction in soils via hand watering and syringing.

Maxiplex is especially effective in:

- RELEASING NUTRIENTS
- IMPROVING MICROBIAL ACTIVITY
- CHELATING MICRONUTRIENTS
- ENHANCING EXCHANGE CAPACITY

PROFESSIONAL USE GUIDELINES

APPLICATION:

Maxiplex pellets will fit most hose-end applicator devices. Place Maxiplex pellet in hose-end application device prior to hand watering. Thoroughly drench desired area.

RATE OF APPLICATION:

Maxiplex pellets will dissolve at different rates depending on water pressure, chemistry, temperature, and flow rate. Normally, the pellets will dissolve after 30-60 minutes when used at 60-90 psi (4-6 bars).

COMPATIBILITY:

Maxiplex pellets are not intended to be combined with any other product.

Net Weight: 12.0 x 0.5 lb (227 g) pellets

Also available:

Maxiplex Magnum Pellets 2 x 7 lb (3.18 kg) pellets
