

BirdieTM

PIGMENT

BirdieTM is a versatile pigment for use in turf applications to enhance chlorophyll, provide uniform color, extend greening in the winter and offer faster green up in the spring.

DIRECTIONS FOR USE

1. Fill sprayer with half of water volume.
2. Begin agitation in tank.
3. Add **BirdieTM** Pigment into water and let agitate for 1-2 minutes. (If applying with chemicals or fertilizers, jar test for compatibility of all products that will be mixed.)
4. Add remaining water to reach desired carrier volume.
5. Apply 16-32 fl oz / acre (1-2 L/ha) for best results.
6. After application rinse and clean tank according to pesticide, herbicide or fertilizer label.

WARNING: KEEP OUT OF REACH OF CHILDREN

Will stain porous surfaces, plants, and equipment.

KEEP OUT OF EYES. IF IN EYES: rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing for several more minutes.

DO NOT ALLOW TO FREEZE

1 gal (3.79 L)
