

Mineral Magic Garden Conditioner

100% Natural ♦ Organic Certified ♦ Waterwise Approved

Transform Your Garden!

Mineral Magic is a unique natural soil conditioner made from Biogenic Amorphous Silica, formed over 125 million years ago in Western Australia. It improves all soil types—sand, clay, or loam—by holding more water and nutrients right where plants need them.

Whether you're growing native plants, vegetables, or roses, Mineral Magic helps create a healthier, more water-efficient garden.

Key Benefits:

- ✓ Holds more than 60% of its weight in water—plant available!
- ✓ Boosts nutrient retention and reduces fertiliser leaching
- ✓ Slow-release plant-available silicon (monosilicic acid)
- ✓ Enhances drought tolerance and disease resistance
- ✓ Improves performance of wetting agents and fertilisers
- ✓ Won't clump or turn sticky like clay
- ✓ One application = permanent results!

Best Uses:

Veggie Patches & Exotic Plants - Increase rates (4–10%) for leafy greens, soft fruiting trees, and roses. You'll water less and grow more—especially in hot summers!

Native Gardens - Add a handful to each planting hole. Perfect for establishing natives with minimal soil disturbance and less summer stress.

Trees & Shrubs - Mix into planting zones or root balls. Use more for large or deep-rooted plants.

Pots & Planters - Mix 5–20% into your potting blend. Enhances moisture retention without affecting drainage.

Available in 10kg bags

Tip: Combine with compost for optimal performance!

Rate of Application:

Crop	Rate	Comments
Garden Beds	500g per m ²	Hoe into existing beds.
Vegetables	10kg per m ²	
Pots & Planters	5-20% of the total potting mix volume	Higher rates for sandy blends, lower rates for loamy or clay rich soil.
Trees & Shrubs	5-20% of the soil volume	Mix into backfill or around root zone
