

Mineral Magic Lawn Conditioner

100% Natural ♦ **Organic Certified** ♦ **Waterwise Approved**

Elevate Your Lawn - The Natural Way

Mineral Magic Lawn Conditioner is a premium natural soil amendment made from biogenic amorphous silica — formed over 125 million years ago in Western Australia.

It permanently improves all soil types — sand, clay, or loam — by storing water and nutrients where your grass needs them most.

Key Benefits:

- ✓ **Keeps lawns greener for longer** – holds over 60% of its volume in water and slowly releases it back to the roots when they need it.
- ✓ **Helps lawns handle dry weather** – slows water loss from the leaves so your lawn stays healthy between waterings.
- ✓ **Stops nutrients washing away** – holds on to fertiliser so plants can use it, instead of losing it through the soil.
- ✓ **Grows stronger, tougher grass** – adds natural plant silicon that helps lawns cope with heat, wear, and disease
- ✓ **Saves money and effort** – healthy lawns need less fertiliser, fewer sprays, and less watering.
- ✓ **Lasts forever** – it doesn't break down or wear out, so one application keeps working year after year.
- ✓ **Improves drainage** – helps water soak through the soil evenly and prevents soggy patches.

How it Works:

Each tiny particle acts like a mini water tank — soaking up moisture and nutrients, then releasing them slowly to feed your lawn.

It never compacts or washes away, so your soil keeps improving over time.

When mixed with compost or organic matter, Mineral Magic helps create living, healthy soil where roots grow deep and strong.

The result? A thicker, greener lawn that's easier to care for and better for the environment.

Available in 10kg & 20kg bags

Tip: For best results, mix with compost or organic fertiliser to boost soil life and lock in moisture.

Rate of Application:

Crop	Rate per m ²	Comments
New or existing lawns	500g	Mix or top dress into root zone. Water in well.
Sandy Lawns	Up to 1kg	Use higher rates where moisture drains quickly.
Clay or Loam Lawns	250-500g	Lightly incorporate into the surface layer.
Renovations or Turf Laying	10-20% of the soil mix	Blend through top 50-100mm before seeding or turfing.
