

Aqueduct Flex is a nonionic soil surfactant impregnated onto a fully dispersible inert carrier. This results in a dry granular formulation that provides performance with the convenience of a spreader application. Aqueduct Flex was developed to provide turf managers with an effective tool to treat symptoms of stressful conditions, including localised dry spot and other water related problems without concern of burning turf, when used as directed. Aqueduct Flex is non-toxic to plants and animals. Aqueduct Flex can safely be applied in the spring, before the irrigation system is activated, as well as during the summer when environmental stress conditions may impact turf performance.
